

## Monthly Air Pollution Control Program Summary Report

### Concerns Received or Investigated Between July 16, 2021 and August 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal

#### Concerns Received During Report Period

	Total
Total	76
Asbestos	6
Fugitive Particulate Matter	12
Hazardous Air Pollutant Release	1
Odor	13
Open Burning	36
Other	8

#### Concerns Investigated During Report Period

	Total
Total	67
Concerns Received Before Report Period	5
Concerns Received During Report Period	62

Number of Notices of Violation Issued: 1

Number of Referral Notices of Violation Issued: 0

Number of Letters of Warning Issued: 11

Please note, the information provided in this report reflects all concerns investigated during the reporting period, regardless of the date on which the original concern was received.

### Concerns Investigated Between

#### July 16, 2021 and August 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 46591    **Concern Info** On July 19, 2021 we were contacted by Ashli Boyle:

I am reaching out with extreme concern about Mt. Carmel. I have attached video footage of an incident that occurred on July 14, 2021 at around 5:43 pm. The silo holding product was overfilled and burst into the air carrying the product into the atmosphere and directly into contact with my house and neighbors (who I have copied to this email). There are more details about that day that occurred and specific information given to us that we can discuss. For now, I am initiating contact with you once more and sharing the video evidence of the incident. There were elderly, children, and pets that were directly impacted by this incident. My neighbors and myself are angry, to say the least. Please let us know what will be done about this matter. Again, there are details and conversations that happened on this day that we address after you see the video. I will send a separate email with all videos that have been taken since we last spoke of the dust issue.

**Comments** The issue causing the excessive emissions had been repaired by the time an on-site investigation could be made. No violations were observed.

KCRO	7/21/2021	7/21/2021	Bluebird Construction	Grandview Jackson	Fugitive Particulate Matter	DS
------	-----------	-----------	-----------------------	-------------------	-----------------------------	----

**Concern No.** 46551    **Concern Info** Responsible party - McCarthy Construction or possibly a different business. Sand blasting is going on, and they're not using appropriate cover which is blowing on to a neighboring business and damaging their product. D. Huseman mobile number 816-809-9149.

- Susan Wayenberg is the owner of the neighboring business, but doesn't work out of there. Although, she needs to be the person of contact.

**Comments** Fugitive emissions were observed on property beyond the site of origin. Bluebird Construction will be sent a report with Unsatisfactory Findings.

KCRO	7/21/2021	7/21/2021	Mt. Carmel Stabilization	Archie Cass	Fugitive Particulate Matter	DS		

**Concern No.** 46590    **Concern Info** Thank you for the response. This is Kristie & Jason Morton, the neighbor that lives behind Ashli's house. Our concern is when will the second unit be installed due to the fact that we have a special needs child and there is a daycare that is in direct contact of the dust that keeps happening. We are not only concerned for our child but all the children that live and u: our block along with the elderly and pets. Moving forward we have been informed that our city officials have no control ove the situation so going forward are we to contact you directly or do we need to contact a state affiliate instead? As you can see from all the emails that Ashli has been sending to you this dust concern continues to keep happening with no result of ending. These houses were here before Mt Carmel was located here and now our property value is going down due to thi facility. Could you please advise who we are to contact on this matter? This was not a public vote for this business to take place in the city limits of Archie, Missouri. Our main concern is to get this resolved before health issues arise.

There was an email response from Daniel Simmons on 3.31.21 at 9:50am that indicated they will chip and seal the parking lot. I'm not sure if you are aware but this has NOT happened. When will this happen?

**Comments** The issue causing the excessive emissions had been repaired by the time an on-site investigation could be made. No violations were observed.

KCRO	7/26/2021	7/26/2021	Troy Jeffries	Sibley Jackson	Open Burning	CK
------	-----------	-----------	---------------	----------------	--------------	----

**Concern No.** 46576    **Concern Info** A home is being burned inside a hole in the ground. The burning began yesterday. There is a bad smell in the air.

**Comments** Troy Jeffries was issued a Letter of Warning for open burning of demolition waste.

KCRO	8/2/2021	7/26/2021	Lakeside Estates Mobile Home & RV Park	Warrensburg Johnson	Open Burning	CK

--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 46577    **Concern Info** The CP lives in a big trailer park near Warrensburg, MO. She states that neighbors had been burning furniture, component of trailers, and carpet rolls at the edge of a cul-de sac. She said there was pile of carpet there during this past weekend and then later on during the weekend the carpet rolls were charred. She thinks the neighbors will be coming back with accelerants to ensure the rest of the carpet rolls get burned up. She checked with Johnson County Fire Protection District and there was nothing they could do.

**Comments** Lakeside Estates Mobile Home & RV Park will be issued an LOW for open burning of durable goods.

KCRO	7/26/2021	7/26/2021	Unknown	St. Joseph Buchanan	Asbestos	JS		
------	-----------	-----------	---------	---------------------	----------	----	--	--

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between

#### July 16, 2021 and August 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 46578    **Concern Info** I received a call from a neighbor of a building which exploded and burned recently, at 1308 S. 20th Street, St. Joseph, MO. The caller indicated there was a video of the explosion, and it was his suspicion that the occupants were making illegal drug at the time of the explosion.

The neighbor is concerned because there was transite siding which was broken up and ejected into his yard by the explosion. He reached out to the city, who indicated they hoped to expedite the demolition. If this residential demolition is part of a larger residential demolition project, the demolition would be regulated, and they may request a waiver of the 10 business day period.

It sounds likely that there is friable material over threshold present. If it is not arson, even if friable material over threshold is present, then the debris can simply be disposed of at a landfill which accepts asbestos, and they should reach out to the landfill to see how they want it presented. However, if it is considered an arson, if friable material over threshold is present, the debris should be removed as part of a regulated abatement. This sounds to me like an accidental explosion, instead of purposeful arson for profit, but I will defer to your opinion.

Please reach out to the City of St. Joseph to provide guidance, and let me know if I can be of any assistance.?

**Comments** The cause of the fire could not be determined, but it does not appear to have been intentional. It is unknown who or what caused the fire. The city of St. Joseph appears to be properly handling the demolition of the building.

KCRO	7/30/2021	7/27/2021	Scott Chrisman	Oak Grove Jackson	Open Burning	DS
------	-----------	-----------	----------------	-------------------	--------------	----

**Monthly Air Pollution Control Program Detail Report**  
**Concerns Investigated Between**  
**July 16, 2021 and August 15, 2021**

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 46588    **Concern Info** RP is advertising for profit to haul trash, furniture, and brush for people and burns it at his property. The Jackson County Fire has been out to put out the fire recently. CP states there's a black plume when he burns and he's seen a couch in his burn piles and there's leftover springs and metal from furniture that he's burned. CP says the pile is behind his house but can be seen from the road.

**Comments** This investigation resulted in a unsatisfactory findings report being issued for bringing in brush from other properties (operating a collection site) and burning within 200 yards of neighbors.

KCRO	8/3/2021	7/30/2021	Roy McMahon	Greenwood Jackson	Open Burning	DS
------	----------	-----------	-------------	----------------------	--------------	----

**Concern No.** 46683    **Concern Info** I received a call today about an individual who has been bringing in lumber and vegetative waste from offsite and burning it. These piles are sometimes very large, and the responsible party burns them at night. The Lee's Summit Fire Department, Station 5, and Greenwood Police have responded to these burns in the past. It is unknown if the individual owns a tree trimming service or not.?

**Comments** No violations were observed at the time of investigation. ?

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between

#### July 16, 2021 and August 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 46737    **Concern Info** Robert Looper, the Fire Chief in Holt, reports that Charles Bryson (RP) burnt down a building (a cafeteria) on his property. The RP claims that the fire was accidentally caused by the exhaust of the dozer that he was using to tear the building down and that he was planning to bury the waste. The fire was not able to be put out due to the size of the building, approximately 40'x100'.

A creek is less than 100 feet away from the building that burned down.

There are 5-6 more large buildings on the property (Approximately 220 acres) that the RP plans to demolish and bury as well, according to Mr. Looper.

**Comments** A Letter of Warning has been issued to Charles Bryson / New Hope Meadows, LLC, for the following: demolition without performing an asbestos inspection, demolition without submitting a demolition notification, open burning of demolition debris, and improper disposal of demolition debris by burning and burying.

KCRO	8/5/2021	8/5/2021	ZMDR, dba Republic Foods	Lone Jack Johnson	Odor	JH
------	----------	----------	--------------------------	-------------------	------	----

**Concern No.** 46738    **Concern Info** Bad odors at 800 road adn 1971 road

**Comments** No odor violations noted at the time of the investigation. ?

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 46762    **Concern Info** A concern was submitted on Saturday August 7, 2021 by email for a dust concern coming from Mt. Carmel in Archie MO at 4:25pm and on August 9, 2021 an email was received about dust coming from Mt. Carmel on Sunday August 8, 2021 at 10:30pm.?

**Comments** ?No violations were observed at the time of investigation.

KCRO	8/16/2021	8/10/2021	Trash Box	Lafayette	Residential Waste Hauler Open Burning	KB
------	-----------	-----------	-----------	-----------	--	----

**Concern No.** 46786    **Concern Info** CP says there is a guy in Bates City who has a Trash Box service, but he takes the trash back to his house and burns it. He thinks the man's first name is Jason and it says "Trash Box" on his truck. His house is located on Old 40 Highway (the south outer road) between Bates City and Odessa. It is located west of a church and there is a temporary asphalt plant a little east of the house. He is building a big gray barn there and right now there is a big pile of trash in his yard. The CP said the this is trash that has brought back from the Trash Box customers.

**Comments** AP sending LOW for burning regulated waste and improper disposal. No violations sent from SW

KCRO	8/12/2021	8/11/2021	Chris and Tiffany Kimball	Excelsior Springs	Open Burning Clay	CK

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 46785    **Concern Info** Neighbor opening burning, concerned party thought it has to be at least 200 yards from next occupy structure. Neighbor is less than 100 years from the house.  
  
Person who lives at the property is not the owner, it is the owner that is burning in the backyard.  
  
Residential area. Believes they are burning lumber and furniture. It is not the first time they have open burned on site. There is a lot of smoke especially if the wind is blowing that direction.  
  
Has contacted the fire department 8/10 but they could not do anything. The fireman stated the stuff was okay to burn. Owner burns about once a month but it is not on a set schedule. The burn from yesterday is still smoking today, 8/11.

**Comments** ?Property owners will be issued a Letter of Warning for burning durable goods.

---

NERO	7/19/2021	7/16/2021	Mary Wright	Marshall Saline	Fugitive Particulate Matter	DB
------	-----------	-----------	-------------	--------------------	-----------------------------	----

**Concern No.** 46527    **Concern Info** Hired company to spray CaCl on 170th Ln in Saline County for dust control, which can lead to rusting out cars that drive over it.

**Comments** This activity is not regulated by DNR. Provided email to complainant and advised him he could contact the county road district or MODOT.

NERO	8/9/2021	8/9/2021	Rob Corbett	Sedalia Pettis	Pesticides or Herbicides	SB		

**Concern No.** 46756    **Concern Info** ?Call came in from a Mr. Renfro that a crop duster is spraying over his house and has been doing this for 14 years. He has called the crop dusting company to stop but they continue spraying over his house. He talked to Mr. Rob Corbett who apologized for spraying over his residence - that he did not mean to but CP stated he continues to do so and even though lives between two fields of corn, that is no reason to keep spraying over his house. His fiance (at the time) was also directly sprayed and he is concerned about his prize chickens he is raising, his dogs, and also his neighbors who have also lodged complaints about this issue as well.

**Comments** Referral to Kory Hubbard with the Missouri Department of Agriculture.

NERO	8/12/2021	8/9/2021	Vladimir Vinnichuk	Sedalia Pettis	Open Burning	RD		
------	-----------	----------	--------------------	-------------------	--------------	----	--	--

**Concern No.** 47022    **Concern Info** The Pettis County Fire Protection District #1 filed a report that twice last week, illegal open burning occurred at 3197 Rissle Road in Sedalia. On Tuesday, 8/3, it was found that several tires were burning along with a side wall to a camper and items from the camper. On Wednesday, 8/4, it was found that the rest of the camper, and two separate trash piles with tires and trash were burning. There is additional trash left on the property and the concern is that it also will be burned.

**Comments** It was found that Vladimir Vinnichuk was responsible for burning regulated waste.

**Concern No.** 46656    **Concern Info** SP:29996  
A commercial tree service is burning multiple large piles of brush scrap in a residential area up next to neighboring houses.

**Comments** ???At the time of my investigation, no open burning was noted. The area was not what would term a residential area. I spoke with Winston Cresswell July 21, 2021. Winston Cresswell stated that he was burning brush piles on his grandfather's farm. Winston Cresswell tries to open burn only rarely as he does not wish to bother the neighbors. The material burned was vegetative waste generated by normal farming operations. The material burned was part of the tree trimming business (i.e. Tall Timber Tree Service). It was vegetative waste generated from farming. I e-mailed my contact information along with a copy of the fact sheet Facts on Open Burning Under Missouri Regulations and the state regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements to Winston Cresswell for his information.

SERO	7/22/2021	7/22/2021	Keen Motorsports	Bonne Terre St. Francois	Other	TR
------	-----------	-----------	------------------	-----------------------------	-------	----

**Concern No.** 46654    **Concern Info** SP:30078  
????Since moving to this area in October of 1990, we have lived under the stressful noise pollution of the Bonne Terre Sand Drags. Much has been tried to stop it, but so far to no avail. We have contacted our county commissioners, and they do nothing. The passing of a noise ordinance in the county would be of help. We just elected these commissioners in the hope they would help us. We cannot sit outside at anytime, especially the weekends, and enjoy the fruit of our labors. We have measured the decibel levels at over 90 from our yard. This is causing a lowering of our property values and lots of stress and anger! Not to mention the reports of what excessive noise does to our health. They site the fact that they are in the county and not the city of Bonne Terre. When you look at the map, you can see the square of the Sand Drags.

**Comments** ?The Missouri Department of Natural Resources does not have or enforce a state noise regulation. Local governments may choose to promulgate, establish, and enforce noise ordinances in Missouri. I e-mailed the concern party to communicate this fact.

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 46997    **Concern Info** SP:30219  
FROM CP: This is a duplicate submission of a concern I submitted earlier today which may not have reached you due to a server malfunction. Lee Lowman, general contractor, is once again flouting the law by openly burning his construction waste in a burn pit far too close to residential dwellings. He will undoubtedly claim that it is just household waste, but household waste fires do not normally smolder for 24 hours and smell like burning shingles. Any outdoor activity downwind of this insufferable smoke must cease and residents must retreat indoors. For reference, MoDNR investigators should seek concern numbers 42597 & 41465.

**Comments** ?At the time of my investigation, no open burning was observed. I tried the address given by the Concerned Party; but no one was home. I left my business card. I spoke with Lee Lowman later by telephone. Lee Lowman stated that he had not been doing any open burning and had moved from 4 State Highway J to 49 Edsall Drive. The mailing address for Lee Lowman is P.O. Box 6, Braggadocio, MO 63626.

?Unknown company bringing in blue barrels with bobcat and they have dug a hole and is setting them on fire. The fire is burning today 08-11-21. They do this quite often.

**Comments** This location is a business with a fence around it, It is next to an electrical substation. It is between 269 and 309 County Road 539 in Miner. The business involved is Presley Enterprises, LLC. The company is a commodity broker, The item they sell is the blue barrels mentioned in the concern. These barrels are acquired from Breyers Ice Cream in Sikeston and sold to others for profit. The barrels are not a waste; however, some of the pallets they arrive on are and are burned on site. Some vegetative or yard wastes have also been open burned on site. The barrels are hauled to the site and stored temporarily awaiting transport once they are sold. Open burning of untreated wood waste is not prohibited by the state regulation 10 CSR 10-6.045 Open Burning Requirements. A copy of the regulation and the fact sheet Facts on Open Burning Under Missouri Regulations were sent to the Kevin Presley.

**Concern No.** 46727    **Concern Info** Email:

Hi I just wanted to report a God awful smell coming from the Ameren coal plant in Franklin County Mo. I live across the street from the power plant for the past 30 years. Since they have been dumping all the nasty coal ash over there

It stinks to high heaven every SINGLE NIGHT. The smell isn't noticeable that much during the day. But it is so bad it makes your nose burn and hurt and gives you headache if you are outside too long. I have a very old dog I have to get up and walk several times during the night. I know nothing will be done about this because the Government is a big fat failure. As long as the money machine wheels are greased no one cares about the people who live there. The smell is so bad tonight I almost barfed. So do what you will with the information (sadly nothing will change) Franklin county sold it's residents to the highest bidder long ago when they had the chance to stop this. I guarantee you this is poisoning our air and water. Lisa Ashley 151 Osage Ln Labadie Mo 63055.

#### July 16, 2021 and August 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Comments</b>								
	7/20/21	Emailed Dave Patterson to call me about an odor concern we received. Got a call back from Stacey Allen to follow-up. I told her we received an odor concern in relation to coal ash that is always present at night and asked about any different operations in the evening. She said they do not have different operations in the evening, but do have a Soda System for monitoring SO2 that indicates inversions and may be related to meteorological data that could be shared. I contacted the concerned citizen to gain perspective on odor description, time and frequency of odor. It was reported as each evening for the last two years. Best description provided was burnt green beans.						
	7/21/21	I visited the site and smelled the coal ash pond and many other possible sources on Ameren's site with no pungent odors detected. I drove the area leading up to the concern address and did not detect a burnt odor. I did detect a musty odor (which was not part of the concern). There are two creeks nearby that come off the Missouri River- Iman Branch & Fiddle Creek. These are likely sources of the musty odor I observed. I also inquired with Ameren about their water recirculation for boilers. The water is recirculated indefinitely unless a leak occurs. The water is harvested from the Missouri river and is treated extensively prior to being used in the boilers because any impurities can cause damage to the turbines. Cooling water has a "catch screen and is cycled through on a constant basis into and out of Missouri River. This is not a likely source of my observed musty odor near Highway T						
	7/22/21	I compiled wind direction data for evenings before and after concern to see if there was a wind direction trend. It seemed most of the time the wind was coming from the south west, or still (see attached excel sheet). Looking at an aerial view I saw a dirt road coming from Ameren's ash pond to an off-site (look at map photo). After looking through plat map records I saw the property was owned by Goodwin Brothers Construction Co. and their website showed them as a contractor for Ameren. I spoke with the manager of the project at that site Charlie Goodwin. He explained the now completed project at that site was harvesting clay for the ash pond, it was a one way road transporting clay onto Ameren property, not bringing ash out to the bordering property. He shared this project has a land disturbance permit MO-RA16118 that he can work on closing out with Jena Adkisson, because they were able to establish grass quickly with the recent rain.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No.</b> 46619 <b>Concern Info</b> Citizen called about a project going on that has resulted in two different substances on his property. There is some type of development project going on at the southwest corner of Vista Ave & S. Newstead Ave. According to the concerned party the owner of the property is Greenstreet Contracting & Restoration (responsible for digging), Bommarito (responsible for grading) and the white powder that is being emitted is involved with a project by Ameren & JF electric. The other substance is a fluid that sprayed from large equipment used during the project (possible hydraulic or transmission fluid) onto the house, deck, garage and plants.								
<b>Comments</b> Matt Turner, St. Louis City Air Pollution Inspector, will investigate and let us know if they need any further assistance. Matt told me he would call Matt right when we got off the phone. I followed up with Ryan to make sure his issue has been addressed. Matt did get in contact with him and he does not need anything further at this time.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 46730    **Concern Info** ?Someone is clearing the parcel directly behind our house, and burning what has been cleared. For a while it was only trees being burned, but they have uncovered what appears to be a dump site and the smell of these things burning is truly noxious. I have no idea what they are burning at this point or if it is harmful. Our entire subdivision must suffer through this terrible air quality with unknown contaminants and I don't think we should have to.

**Comments** I visited the site on July 28, 2021. I noticed a land clearing operation done in preparation for new construction of a subdivision behind house #30, #26 #22, #18, and #14 located on Saddle back Ridge Drive.

My GPS unit reading was 685997.0 meters easting ( 39.006459 ) , and 4319687.6 meters northing ( -90.851931 ) plus minus 4.78 meters is within the margin of reading error compared to the coordinates ( 39.006459,-90.851931) identified by the caller as the location of the open burning site. The land clearing site is approximately 5 miles west of Winfield. The lady I talked to, residing in house #18 on Saddle Back Ridge Drive told me that a private company is clearing the land right behind her house to sell the land for a subdivision builder and the clearing has been going for awhile now. There was no active open burning on site at the time of investigation. However, there were piles of trees and wood covered with dirt, which appears to be left over from a previous open burning activities. It looks like the clearing operation has ended and the site is advertised for sale by Racks and Tracts Company (636-528-9500, [www.racksandtracts.com](http://www.racksandtracts.com)), specializing in sales of agricultural and hunting properties. An advertising sign is posted at the site visible from highway 47. I mailed out an open burning fact sheet and a copy of Missouri open burning regulation to the physical address (330 East Wood Street Troy, MO 63379) of the company.

### Concerns Investigated Between

#### July 16, 2021 and August 15, 2021

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 46732    **Concern Info** ?Citizen called about open burning occurring within 200 yards of a gas station. They wanted me to call the fire department immediately. They were not comfortable to call the fire department themselves because they said rocks would be thrown through their window.

**Comments** 7/27/21 I called Lincoln County Fire Department right away. Spoke with Donna, who already received a call about this location and had someone checking it out. Got a call back from Robert at the fire department saying that they do not have open burning restrictions outside the city of Troy and that this address was not technically in Troy, but was right on the border. I checked on google maps to confirm this claim. Robert gave me the property owner's phone number. Jim Heitman shared that there was a house and an old shed. They got a dumpster for shingles and other demolition waste that was not wood. Wood was stacked with trees on top and it was burning. Mick Mehler & Sons, Inc (573-384-5978) did the demolition of the structures as the property owner did the burning. Mr. Heitman said he was leaving it over night to smolder and it should be out in the morning. I questioned the safe of this and asked him to put it out. He explained he didn't have a way of doing that and I again questioned about him starting a large fire he could not put out. He said the fire department could (unfortunately unwilling). I spoke with him about if it was residential or commercial, he said both - so I told him I would call him right back while I figured that out. Concerned party called me again to tell me that the fire department did nothing, and I told them I was still working on the case to figure out if it was private or residential. Concerned party shared that it was commercial, up for sale and that the realtor is Rick Meyers. I found the property posted as commercial for sale <https://meyerlistings.com/properties/commercial/troy/1840-highway-47-west/>. Concerned party gave me contact info for the gas station owner as well, Phil Park (314-401-5447). I called Mr. Heitman back 12 times between 2:29pm & 2:59pm with no answer and left a message that the fire did need to be put out because it is commercial property without a 200 yard buffer. After hours I received three missed calls from Mr. Heitman at 5:55pm, 5:56pm.

7/28/21 Before hours I received another missed call from Mr. Heitman at 5:57am. I called him back and he told me he was going over there this morning to put it out if it wasn't out yet. He said the whole thing was blown out of proportion and that he will not do it again.

--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 46811    **Concern Info** ?Elementis at 5548 Manchester Ave St. Louis MO. The Company is violating their current air permits and Shift Supervisors are not trained to perform air emission testing. Clay transfer is supposed to be zero emission and the opacity is around 20%. Oxidizers do not perform to States requirements and paperwork is falsified. This is causing unwanted release of emissions into the Hill Neighborhood

**Comments** ?I visited the facility in the AM hours of Augst 10, 2021. I met the EHS Manager (Bryan Fur) and explaned the puprpose of my visit. I observed the clay silos located outside at the east side of the facility. I observed a truck unloading caly materias into the silos and did not see any dust emitted out or any dust material on the ground from the unloading opertions. I observed the two oxidizers (one was newly installed) while in operartion and there was no dust/particalutes I could see flying arround.

I conducted a CEI at the facility less than a year ago and found it to be in compliance. Bryan Fur told me that they recently fired a supervisor and that person may be the one who submitted the complaint.

**Concern No.** 46548    **Concern Info** Caller states that a neighbor who owns an excavating company is bringing dump truck loads of timber and then occasionally burned in the middle of the neighborhood.

**Comments** See SharePoint #30059

SWRO	7/22/2021	7/21/2021	Cross-Midwest Tire	Springfield Greene	Other	RM
------	-----------	-----------	--------------------	-----------------------	-------	----

**Concern No.** 46552    **Concern Info** Concern received via email on 7/21/21

At approximately 1:00 PM I observed a large plume of black smoke, followed by a smaller but consistent stream of white smoke billowing from a tractor trailer located on the Cross-Midwest Tire property. The smoke was exiting through a circular hole in the back door of the tractor trailer. Duct piping exits the warehouse building to the east of the trailer after which it passes through a blower on the ground behind (north) the trailer before apparently exhausting into the trailer. I have photo and video documentation of the white smoke but did not have my phone at the time I observed the black smoke.

This plume is billowing into a highly disadvantaged residential area. According to the EPA's environmental justice mapper the adjacent neighborhood has low educational attainment (45% of individuals 25 or older didn't graduate high school) and 81% households are low income.

--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 46759    **Concern Info** The location of the property of concern is 342 Wright Street in Stotts City. Herbert Tune has a junk yard where he is burning trash, including electronics. Any metal remains, are being loaded on a trailer and hauled off for scrap. The smoke is black and this is the second day of burning.

As a neighbor, our family is having to stay in our home as the air is hard to breath in and smells toxic.

We have had continuing ongoing issues with this man and the group of people that he runs around with who refuse to quit burning toxic items.

He was burning on the city right of way across the street from the tow yard. There is also concern about the piles trash that is left on the property and that he is operating a business with no running water or sewer. As a citizen, I am concerned about the oil, gas, other misc vehicle fluids, the trash, and now the burning that is leaching into our roads, and air.

The property is the name of Rosenna Joiner (deceased) but the daughter (Stephanie Foster) lives across the street. However Herbert Tune is the business owner using the property. He has been told on numerous occasions to stop burning.
